[Why does the range of datatype number in oracle database is 38?](#)

I read oracle docs that the range of datatype "number" in database is 38, and that is maximum range. I google it and cant find anything except 38 is laws of karma, guardian angels

How to install graphviz-2.38 on windows 10

Download the stable Graphviz version by clicking Stable 2.38 Windows install packages from here
Install Graphviz library using pip install graphviz
Since you're using windows, check out the

[numeric\(38,0\) as primary key column; good, bad, who cares?](#)

In Oracle, our primary keys have a data type of number (38,0). Does anybody know of possible side-effects and performance impact of such implementation? I have always advocated and implemented

[ESP32-WROOM-38pin, pin number to control onboard LED](#)

I have one of the boards in the image below, which as far as I can work out is called a ESP32 WROOM devkit 38-pin. I've successfully flashed micropython, and can obtain a REPL

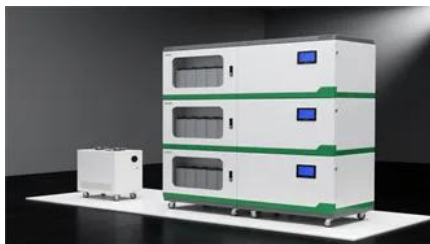

[Bluez can't connect permanently to a Bluetooth LE remote "Function"](#)

Bluez can't connect permanently to a Bluetooth LE remote "Function not implemented (38)"

What exactly does '3.4E +/-

2 float: Range is from 3.4E-38 to 3.4E38 (positive or negative), with 7 significant digits of precision.
double: Range is from 1.7E-308 to 1.7E308 (positive or negative), with 15 significant digits of

Snowflake: Number out of representable range: type

Number out of representable range: type FIXED (38,36) {nullable}, value 772.4018280000000000000000000000 The data type of all the numeric fields we use is NUMBER(18,6).

& or & what should be used for & (ampersand) if we are

For those that wonder if & and U+0026 (or %26 in URL encoding) are related, 26 is hexadecimal for 38. If you both save your file in UTF-8 and even specify it for strict browsers:

[Function EXTRACT does not support NUMBER \(38,0\) argument type](#)

One of your columns is NUMBER (38, 0) and it needs to be converted to date, time, or timestamp first. Here is some example
