Renewable energy in Ethiopia

OverviewSolar PowerElectricity supplyHydropowerWind powerGeothermalBiofuelsExports

Ethiopia has ample solar energy potential and is one of the most solar-rich places in Africa, with an average total daily solar radiation of 5-7 kWh/m². But their growth has been tightly limited by the high upfront costs involved in producing and installing solar panels. Establishing solar projects which requires an initial investment of one to two million dollars per megawatt, proposing a financial challenge on a developing nation such as Ethiopia.
