How to write if-else in assembly?

How to write the equal condition (in the question) in assembly? Your example has an else statement while mine uses an else if.

[What do the dollar \(\\$\) and percentage \(%\) signs represent in x86](#)

I am trying to understand how the assembly language works for a micro-computer architecture class, and I keep facing different syntaxes in examples: `sub $48, %esp` `mov %eax,`

Assembly Programming

This is a subreddit for people who need help with programming in assembly and people who want to post their own code to help others out.

[You must add a reference to assembly 'netstandard, Version=2.0.0.0](#)

The following assembly has dependencies on a version of the Framework that is higher than the target and might not load correctly during

runtime causing a failure: netstandard,

[How to use Assembly on windows ? : r/Assembly_language](#)

How to use Assembly on windows ? Hello everyone I want to code in Assembly, but I can't find compilers to run the programs.All I can work on is the MASM in Visual Studio, but people

terminology

The assembly is a piece of code/executable that is in machine executable code. This might be an obj, exe, dll, It is the result of a compile. The assembler is the "compiler" that compiles

[Module could not be loaded, assembly with same name :](#)

Import-Module: Assembly with same name is already loaded Ive tried uninstalling the modules, removing them (remove-module, uninstall-module) and then installed and imported again

[Could not load file or assembly or one of its dependencies](#)

I'm having another of these "Could not load file or assembly or one of its dependencies" problems. Additional information: Could not load file or assembly 'Microsoft.Practices.Unity, Version=1.2.0.0,
