

Australia's photovoltaic energy storage capacity

Overview

Australia's solar and energy storage sectors delivered strong performance during the third quarter of 2025, with grid-scale solar generation reaching 1,699MW average output while battery storage systems expanded capacity by 2,936MW since Q3 2024. Australia's rooftop solar fleet continues to expand with a combined 28.3 million installations across the country. From pv magazine Australia A new report from the Clean Energy Council (CEC) shows Australian homes and. More than 300,000 rooftop solar systems were installed across Australia in 2024, bringing the total number to more than 4 million. While these households and small businesses are reducing their bills by a collective \$6 billion annually, they could almost double those savings by installing a. As of December 2025, Australia's over 4.1 GW photovoltaic (PV) solar power. Aggreko has unveiled plans to build what. tory 4. This is possibly due to the impact of increased cost of living pressures and interest rates.
