

China-Africa Battery Energy Storage Prices

Overview

This report provides the latest, real-world evidence on the cost of large, long-duration utility-scale Battery Energy Storage System (BESS) projects. According to BloombergNEF's Levelized Cost of Electricity 2026 report, the cost of battery storage projects plummeted to new lows in 2025 even as most other clean power technologies became more expensive. That was a 31% decline from 2024 numbers. Although the annual survey last year. Solar installations in Africa are expected to get more expensive next month as China ends discount schemes. China's decision to end value-added tax rebates on solar panel exports is expected to take effect on 1 April. In 2024 average prices dropped faster there than anywhere else in the world, falling by nearly 30%. Speaking at Solar Storage Live Cape Town, Nicola Cencelli, JUWI Head of Business Development. Energy storage battery cell prices in China have climbed over 15% in Q1 2026, with the mainstream 314Ah cells hitting 0.36 yuan/Wh amid acute supply shortages. The rally is driven by a structural supply gap, as top manufacturers phase out 314Ah cells for newer 500+Ah models while demand from.
