

China-Africa export solar inverters

Overview

Solar currently accounts for only 3% of electricity generation on the continent, but solar capacity is expanding rapidly, and the end of the 9% value-added tax rebate on Chinese exports of photovoltaic modules, cells and inverters as of April 1 could hasten adoption.

China's Solar Industry Follows the Sun to Africa

Chinese solar firms are exporting far more to Africa as their U.S. and European markets fade. That could make the Sino-African trade relationship even more one-sided.

[Africa's solar costs could rise as China cuts export subsidies](#)

China's removal of solar export tax rebates could prompt a rush on solar energy investment in Africa before prices increase.
