

China's first energy storage system

Overview

The Rudong project is the world's first commercial scale deployment of a non-pumped hydro, gravitational energy storage system. An anticipated 80% round trip efficiency puts the EVx™ ahead of competing long duration technologies such as flow battery, thermal, and compressed air.

China's first energy storage system

[China's Energy Storage System: Innovations and Policy Impact](#)

For the first time, its total installed non-fossil fuel energy power generation capacity surpassed that of fossil fuel energy, reaching 50.9%. This shift is largely attributed to the rapid growth

[Across China: Pioneering energy storage system lights up "roof of the](#)

The world's first intelligent grid-forming photovoltaic and energy storage power station, tailored for ultra-high altitudes, low-temperatures and weak-grid scenarios, has been connected to
