

Clean electricity vanuatu

Overview

The Government of Vanuatu (GoV) has set ambitious targets of reaching 100% renewable energy for electricity production by 2030, requiring 5% energy savings through energy efficiency measures in commercial and residential sectors. This figure is significantly below the global average of 3658 kWh per person. This achievement is the result of a strong partnership between the Government of Vanuatu, the United Nations. The Vanuatu National Power and Water Authority (VANPAWA), a subsidiary of VNPF, has partnered with Mana Pacific in completing the process and paperwork for establishing an 18 years power purchasing agreement (PPA) for supply of electricity in Tanna, generated by a 300kW solar PV system. Mana. Established in 2018, The National Green Energy Fund is a financial vehicle designed to assist the Government to achieve its National Energy Roadmap targets through both public and private investment in technology and infrastructure across Vanuatu. The National Green Energy Fund aims to boost. The updated National Energy Roadmap (NERM) 2016 recognized the dual importance of renewable energy and energy efficiency as pivotal to achieve the NERM's vision of energizing Vanuatu's growth and development through the provision of secure, affordable, widely accessible, high quality, clean energy. Burning of fossil fuels and petroleum to produce energy for electricity releases greenhouse gas emissions into the atmosphere causing climate change. The Government of Vanuatu through the Ministry of Climate Change are taking concrete actions to mitigate climate change by promoting the use of.
