

# Climate change tbilisi

## Overview

---

On the following diagrams, you can see how climate change has already affected the region of Tbilisi during the past 40 years. This suggests deteriorating conditions, with increasing negative impacts on weather patterns and environmental conditions. Avg. Situated in the South Caucasus Region bordered by the Black Sea to the West, the Russian Federation to the North, Azerbaijan to the East, Turkey to the Southwest, and Armenia to the South, Georgia is a small country supplied with profitable natural resources, heavenly scenes, copious water assets. Weather Spark lets you compare and contrast the weather and climate between any two to four cities worldwide. Even better than a side-by-side comparison, the report shows you the information in unified graphs. The Paris Agreement of 2015 sets out a global framework to limit global warming to well below 2°C, preferably to 1.5°C (degrees Celsius), compared to pre-industrial levels. To achieve this global temperature goal, countries aim to reduce growth of greenhouse gas emissions as soon as possible and. for development, monitoring and evaluation of policy documents". The "baseline forecast" is calculated in different models and aggregated in the LEAP. By unpacking key global climate debates and their implications for Georgia, this article highlights the pressing need for a more nuanced public discourse on climate justice, as well as greater accountability from both state and international actors, in Georgia and beyond. In November of this year.
