

Communication base station inverter paralyzed

Overview

LONDON - United States energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication equipment was found inside some of them, two people familiar with the matter said. Abstract: Grid-connected inverters are known to become unstable when the grid impedance is high. Power inverters, which are. Undocumented communication devices have been discovered in some Chinese-made solar power inverters used in photovoltaic and wind power plants, including those deployed in Europe. experts who dismantled equipment.
