

Communication green base station belongs to the building

Overview

Rooftop Tower, also known as rooftop telecom angular tower or rooftop base station, serves as a steel supporting structure designed for communication systems. These towers mount directly on buildings to reduce height requirements and overall costs. The green base station solution involves base station system architecture, base station form, power saving technologies, and application of green technologies. We review the architecture of the BS and the power consumption model, and then summarize the trends in green cellular network research over. This study presents an overview of sustainable and green cellular base stations (BSs), which account for most of the energy consumed in cellular networks. The release of the C² China Mobile Carbon Peak and Carbon Neutrality Action Plan White Paper in 2024 outlined the.
