

Community solar distributed energy storage

Overview

The new community solar program will seek to improve rates, reliability, and equity by including storage and carving out 51% of subscriptions for low-income households. As of May 2023, the California Senate Budget Committee proposed \$400 million for investment in community. Since 2007, California has dedicated over \$1 billion towards low-income and community renewable energy programs. The state's low-income rooftop solar, low-income multifamily solar, and community solar programs have resulted in over 13,365 approved projects and 430 MW of solar capacity online or in. Aurora Energy Research shows AB 1260 would reduce peak demand, avoid expensive infrastructure, and unlock guaranteed savings for families. SACRAMENTO, CA - A new grid impact study conducted by leading energy modeling firm Aurora Energy Research finds that scaling up community solar and storage in. Community solar is one of the fastest growing segments of the U. The amount of community solar (measured in megawatts) more than doubled, on average, each year between 2010 and 2021. About 1800 MW came online in 2021 alone. Energy storage in particular can be adopted at the local level due to the flexible and scalable nature of the technology.
