

# Concrete Solar Support Supplier

## Overview

---

We produce concrete ballast blocks for both rooftop and ground based solar arrays. Our ballast units are manufactured in a controlled environment that is not impacted by weather conditions. Concrete solar ballast units are used for flat ground and roof-mounted applications requiring ballast weight to secure panel arrays and provide the dispersion of point loads without the need for roof or. NRP supplies durable solar ballast blocks in Los Angeles, built to stabilize flat-roof and ground-mounted racking systems without penetrating the roof surface. The solar ballasts are designed to meet the project specifications determined by the rack manufacturer or the structural engineer of. The Solar Panel Ballast Blocks provided by RCP Block & Brick are a durable and simple way to add ballast weight to your solar panel array.
