

# Construction of battery for telesolar-powered communication cabinets in greece

## Overview

---

Following a brief consultation in late February, the Greek government has unveiled a new battery storage program targeting 4.7 GW of utility-scale, standalone projects which will be given a priority connection and operated on a merchant basis without subsidy support. Among various battery technologies, Lithium Iron Phosphate (LiFePO<sub>4</sub>) batteries stand out as the ideal choice for telecom base station backup power due to their high safety, long lifespan, and excellent thermal stability. 7 GW. Energy Storage: Construction of two battery storage stations in Meliti and Ptolemaida completed, while the Amyntaio station is progressing rapidly-pumped storage units are also advancing.
