

Cyprus exports household solar panels

Overview

Households and small commercial solar users in Cyprus can legally avoid periodic cut-offs by switching their systems to a zero-export connection, according to information given to Phileleftheros. However, the cost of doing so may outweigh the financial benefit for most consumers. Installed. The Cypriot Parliament has unanimously approved a legislative package targeting a growing issue: the curtailment of electricity produced by households and businesses using solar photovoltaic (PV) systems. This shift is driven not only by the geographical advantages of Cyprus-boasting abundant sunlight for most of the year-but also by government policies promoting. Strong reactions are emerging in Cyprus over the deletion of accumulated kilowatt-hours from household solar panels, as the first "inflated" electricity bills begin to appear.
