

# Difference between split-phase inverter and single-phase

## Overview

---

Single-phase inverters are suitable for smaller, less demanding applications, while split-phase inverters provide greater versatility, efficiency, and the ability to manage higher loads. In many residential solar setups, Single Phase On-Grid Inverters are the default choice because they match the home electrical system and are simple to install. The difference between single-phase inverters and split-phase inverters is fundamental in understanding how they operate within electrical systems.
