

Does Italy's solar grid connection require energy storage

Overview

Transmission system operator (TSO) Terna says that some 94GWh of new energy storage will be needed to integrate the country's renewable energy pipeline, although this may include some pumped hydro energy storage (PHES). The government has set ambitious goals for increasing renewable energy on the national. Italy may be best known for its sun-drenched rooftops and scenic countryside, but its energy sector is rapidly making headlines for another reason: battery energy storage. The integration of storage systems with. Let's unpack this electrifying trend: Italy added a staggering 1.6% year-on-year growth in installations. Energy storage systems are a strategic asset to guarantee security and flexibility to the national electricity. Italy concluded the year 2023 with an impressive tally of 518,947 energy storage systems (ESS) integrated into the grid, marking a notable surge from the preceding year. According to data sourced from ITALIA SOLARE and Terna, these systems collectively wielded a power capacity of 3.
