

# **Does anyone in Thailand use solar power to generate electricity**

## Overview

---

As of 2025, solar power makes up around 3% of Thailand's electricity generation. In 2013 installed photovoltaic capacity nearly doubled and reached 704 MW by the end of the year. 04 GWh, representing an increase of 7,792. The electricity was generated from diverse fuel sources, with natural gas remained the dominant source with 128,678. That growth isn't slowing down. With residential system prices dropping below 30 THB per watt and a new 200,000 THB tax deduction now in effect, solar has shifted from a nice-to-have to the. Thailand started 2024 with just under 5 GW of cumulative photovoltaic (PV) capacity and a compound annual solar growth rate of 20% since 2012. Flagship solar energy projects in Thailand are becoming increasingly. Thailand continues to promote solar PV as a key pillar of its energy transition, aligned with decarbonization goals and energy security objectives to become net zero GHG emission by 2050.

## Does anyone in Thailand use solar power to generate electricity
