

# Does the photovoltaic bracket need to be installed on a rack

**Higer conversion efficiency**

CAN/RS485/WIFI/4G  
Blue tooth communication

20 Kwh

30 Kwh

50 Kwh

Thick shell, well protection for inside cells

BMS customization supported

The advertisement features three white, stacked energy storage units on wheels. Each unit has a digital display and control panel. The units are arranged in a row, with the 20 Kwh unit on the left, the 30 Kwh unit in the middle, and the 50 Kwh unit on the right. The background shows a house and a clear sky. The text is presented in a clean, modern font with green accents.

## Overview

---

Home solar panels need to be mounted on special racking. While you won't need to go up on your roof and work on a system's racking, knowing more about how professionals mount solar panels may give you more understanding of your solar system and how it works. To protect your home and solar system. But only by mounting solar panels to your roof rack can you generate enough power to gain energy independence and elevate your adventures. Forget about sacrificing roof rack capacity for solar power. Ensure the bracket is properly aligned and securely tightened to prevent movement.
