

Export of solar energy storage integrated equipment to the Middle East

Overview

Exporting energy storage systems to the Middle East isn't for the faint-hearted. Pro tip: Saudi Arabia's SASO recently greenlit 12-hour fast-track approvals for thermal. According to foreign media reports, the Egyptian government recently announced that it has signed a series of agreements worth over 1.8 billion USD with Norwegian renewable energy developer Scatec and Chinese energy storage company Sungrow. These agreements aim to build large-scale solar+storage. These data powerfully reflect the profound transformation of the energy pattern in the region in real time - from pure solar power generation to integrated solar energy + Middle East energy storage system. Traditionally, the inverters exported to the Middle East are mainly serial and centralized. For this project, after thoroughly assessing the client's needs, GSL ENERGY customized a 2MWPCS and 4.6MWh energy storage project in Lebanon officially went into operation, marking the recognition of GSL ENERGY's solar-storage integrated solutions by clients in the Middle East.
