[How to set an index URL for 'uv'-like pip configurations](#)

When using pip to install Python packages, we can set the configurations, so that it can refer to some private repository to install packages. The use case is, for example, for big companies

python

Similar to this question, we want to specify an extra package index to be used by uv. However, our package index url contains private information, i.e., user name and token. Up to now,

python

See Installing Setuptools "Extras" in the Installing Packages section of the Python Packaging User Guide. It is up to the installed package itself to detect if all the dependencies for

[Why are there extra untagged 'images' in Amazon ECR after doing](#)

I've pushed some Docker images to Amazon Elastic Container Registry (ECR), and I'm not sure why there are extra untagged images. This happens for multiple of my images but one of my

Deye High Voltage Outdoor Cabinet 100Kwh 200Kwh
