

Flower solar power

Overview

This is a solar power generation device with a petal-like structure that can rotate and fold, and is installed on the ground. This 'smart' solar panel system is an all-in-one, self-sustaining system that differs greatly from the traditional monocrystalline or polycrystalline rooftop. In a world filled with countless rectangular solar panels, Smartflower is a rare, novel solar product. By the end of 2024, Americans had installed 219. This smart energy solution, in contrast to conventional panels, ensures optimal energy absorption throughout the day by simulating how sunflowers follow the sun. It follows the theme that started with the Tesla solar roof launch, which is making more aesthetically pleasing solar panels. The Smartflower then directs its.
