

# Glass commonly used in Huawei solar modules

Nominal Capacity

**280Ah**

Nominal Energy

**50kW/100kWh**

IP Grade

**IP54**

## Overview

---

Glass used in solar panels is primarily low-iron tempered glass, with a thickness typically between 3 to 6 millimeters, ensuring optimal light transmittance and durability. This type of glass is specifically engineered to enhance the efficiency of solar energy absorption by. With global solar capacity projected to reach 4,500 GW by 2030, Huawei's photovoltaic glass solutions address critical challenges in energy conversion and architectural integration. Let's explore these options to understand their benefits and use cases in solar panel manufacturing. [Glass Size Contact Us](#) | [Terms of Use](#)
