

How about 370 photovoltaic panels

Overview

REC 370W panels are discontinued as of 2025 - REC has shifted focus to higher-wattage Alpha Pure series (400-470W) with superior efficiency up to 22.6%, making the 370W models obsolete in their current lineup.

IBM System/370

The S/370-XA architecture, first available in early 1983 on the 3081 and 3083 processors, provided a number of major enhancements, including: expansion of the address space from 24-bits to 31-bits;

The Jim Austin Computer Collection

The system could be run using all four processors as a coupled multiprocessor or using each 3081 K separately as two dyadic systems. Running the system as a coupled multiprocessor improved the
