

# How to collect the photovoltaic panel installation fee

## Overview

---

This guide covers everything you need to know about solar costs, including average prices per watt, system size estimates, incentives, regional differences, and payback timelines. As of 2025, the average cost to install solar panels in California is around \$2. Except as provided in paragraph (2), for photovoltaic systems, that fee shall not exceed four hundred fifty dollars (\$450) plus fifteen dollars (\$15) per kilowatt for each kilowatt above 15kW. Assuming an upfront purchase, it takes about 5.63 years to break even (when. Each month, billing will include charges for energy used from the electric grid, as well as energy credits exported to the grid. 1 Renewable generation includes solar, wind, renewable gas, and other technologies that satisfy the CEC Renewable Portfolio Standard (RPS) qualifications. California offers an Active Solar Energy System Exclusion for homeowners to be protected from excessive property taxes until 2026. Solar panel systems provide residents with the ability to generate their own. Solar panel installation costs in Los Angeles range between \$19,147 and \$34,872, with an average of \$27,010.
