[How can I get Python Requests to trust a self-signed SSL certificate](#)

`r = requests.post(url, data=data, verify=False)`
However, I would like to point Requests to a copy of the public key on disk and tell it to trust that certificate.

How do I get the current time in Python?

Use the below sample script to get the current date and time in a Python script and print results on the screen. Create file `getDate1.py` with the below content.

HTTP POST and GET using cURL in Linux

HTTP POST and GET using cURL in Linux Asked 13 years, 1 month ago Modified 6 years, 6 months ago Viewed 1.4m times

Understanding .get() method in Python

Here the get method finds a key entry for 'e' and finds its value which is 1. We add this to the other 1 in characters.get (character, 0) + 1 and get 2 as result.

Homeowner's Guide to Solar

Department of Energy Since 2008, hundreds of thousands of solar panels have been installed across the country as more and more Americans choose solar energy for their daily lives. Investments from

[Get the values from the "GET" parameters \(JavaScript\)](#)

So, I've come up with a simpler script that returns all the GET parameters in a single object. You should call it just once, assign the result to a variable and then, at any point in the future, get any value you

Understanding dictionary.get in Python

As you have found, get just gets the value corresponding to a given key. sorted will iterate through the iterable it's passed. In this case that iterable is a dict, and iterating through a dict

What is the { get; set; } syntax in C#?

get and set are accessors, meaning they're able to access data and info in private fields (usually from a backing field) and usually do so from public properties (as you can see in the above example).

How to get all groups that a user is a member of?

PowerShell's Get-ADGroupMember cmdlet returns members of a specific group. Is there a cmdlet or property to get all the groups that a particular user is a member of?

When do you use POST and when do you use GET?

From what I can gather, there are three categories: Never use GET and use POST Never use POST and use GET It doesn't matter which one you use. Am I correct in assuming those three

How to make an HTTP get request with parameters

Is it possible to pass parameters with an HTTP get request? If so, how should I then do it? I have found an HTTP post request (link). In that example the string postData is sent to a webserver. I
