The image shows a tall, grey Energy Storage System (ESS) cabinet. It features two vertical green stripes running down the center. In the middle, there is a blue hexagonal shape with a black lightning bolt symbol inside. At the top right, the letters 'ESS' are printed in green. At the bottom, there are two yellow triangular warning symbols with lightning bolts inside, indicating high voltage or electrical hazards.

Overview

To protect solar inverters from lightning damage, install appropriate Surge Protection Devices (SPDs) 1 on both AC and DC sides of the system. Select SPDs with voltage ratings matching your system's maximum voltage, and ensure they're properly grounded. As a. Now, we move from theory to application, exploring three major scenarios of surge protection for inverters - solar inverter surge protection, outdoor and mobile inverter protection, and residential inverter surge protection. What is Lightning Protection, and Why Does It Matter?

. When lightning strikes, it can induce power surges that travel through electrical wiring, damaging sensitive components like inverters and batteries.
