

# Indoor temperature standards for energy storage equipment

## Overview

---

The UL9540 qualification encompasses a variety of standards, including electrical safety, battery system management, thermal stability and overall system honesty. The 2022 NYC Fire Code Section 608, New York City Fire Department (FDNY) Rule 3 RCNY Section 608-01 and the Department of Buildings (DOB) Codes and Rules shall be followed for the design and installation of Outdoor ESS systems require approval. Provides safety-related criteria for molten salt thermal energy storage systems. Provides guidance on the design, construction, testing, maintenance, and operation of thermal energy storage systems, including but not limited to phase change materials and solid-state energy storage media, giving safety strategies and features of energy storage systems (ESS). Applying to all energy storage technologies, references along with references to specific sections in NFPA 855. New Rule, 64-1100 provides the requirements for location and separation of ESS installed at residential occupancies either.
