

# Industrial microgrids canada

## Overview

---

It summarizes the current state of the microgrid industry and its standardization landscape, outlines emerging trends that will shape the industry, and identifies the challenges that are impeding microgrid deployment. Canada's electricity grid is over 83% emission-free. Around 300 Northern and remote (islanded) communities are not connected to the North American electricity grid. 🌱 Improve access to funding and provide support for clean energy initiatives in Indigenous, rural and remote. The National Research Council of Canada's microgrid test facility, located at the Vancouver Clean Energy Innovation Research Centre, accommodates a wide range of pre-commercial power generation and storage technologies. Our experts can integrate your pre-commercial power generation and storage. The Commercial and Industrial (C&I) microgrid market is experiencing robust growth, driven by increasing electricity costs, unreliable grid infrastructure, and the rising adoption of renewable energy sources. Particularly interesting is the volume of microgrid and distributed energy projects in Canada.
