

Inspection of uninterrupted power supply of communication base station

Overview

Here are some key steps to maintain backup power for telecommunications base stations. Regular Inspections: Conduct routine. The stable operation of mobile communication networks directly depends on the uninterrupted and reliable supply of electricity to base stations. Practice shows that the existing energy supply sources - the power grid, diesel generators and batteries - do not allow for effective operation in. What is uninterruptible power supply (UPS)?

Uninterruptible power supply (UPS) is the last line of defense to ensure the safe and stable operation of the key equipment of the communication base station. As the "first line of defense" at the power access point, the drop out fuse plays a crucial role in high-voltage power distribution. For telecom operators, a power outage never means 'service suspended. To make sure the system performs reliably in.
