

# Is the grid-connected inverter real

## Overview

---

The grid-tied inverter is an inverter that converts DC power generated by distributed power sources such as solar panels into AC power and directly connects it to the public power grid. It allows users to sell excess power to the grid, realizing power recovery and revenue. Whether you're a homeowner looking to reduce electricity bills or a business aiming for sustainability, understanding how a On-Grid inverter. An inverter is one of the most important pieces of equipment in a solar energy system. They differ in their functions, application scenarios, and features, which are compared and summarized in detail in this blog.
