

# Italy energy storage for load shifting

## Overview

---

All the projects are lithium-ion battery energy storage systems (BESS) and need to come online in 2028, with contracts going for 15 years. Under MACSE, Terna will effectively rent the BESS' flexible capacity for an online marketplace allowing renewable energy operators to procure. Italy's cumulative 692,386 energy storage systems, installed by Sep. 30, 2024, had a total power output of 5,034 MW and storage capacity of 11,388 MWh, according to the National Federation of Electronic and Electrotechnical Companies (Anie). Italy's Anie said the boost for small-scale energy. shaping industries and sustainability?

This data-driven research reveals how emerging solutions slow down climate change and remove carbon emissions. 2% in 2024 compared to 2023, reaching 312.3 billion kWh, with a peak hourly demand of 57. As solar and wind installations proliferate across the peninsula, batteries are becoming essential to unlocking their full. The European Commission has approved, under EU State aid rules a €17. The measure contributes to the achievement of the objectives of the European Green Deal and 'Fit for 55' package, by. As Italy's energy mix is increasingly composed of variable renewable energy sources, electricity storage will be needed to integrate power generated by renewables into the national grid and make it available when sun and wind energy are not accessible. In addition, electricity storage is critical.
