

Jamaica Photovoltaic Energy Storage Container Exchange

Overview

This map presents the results of a study to identify suitable sites for utility and distributed-scale solar PV and wind technologies across the island of Jamaica. This 20ft collapsible container solution features 60kW solar capacity and 215kWh battery storage. Built with robust 480W modules, it powers extended off-grid missions, from microgrids to rural factories, ensuring continuous operation even under adverse conditions. It's ideal for rapid deployment in disaster zones or off-grid locations with minimal infrastructure. The Generation Procurement Entity (GPE) has launched the largest mandatory renewable energy plus battery storage tender in the English-speaking Caribbean - 220 MW of new renewable generation capacity paired. This system combines advanced solar panels, a high-capacity lithium battery, and a hybrid inverter to provide reliable off-grid energy to residential homes.
