

Malta graphene energy storage power station

Overview

Malta's new energy storage solution has the potential to revolutionize the future of grid-scale energy storage. The system can draw electricity from the grid in times of plenty and store it for hours or days, waiting until a time of high demand before releasing the power back. Malta's grid-scale, long-duration energy storage system helps governments, utilities, and grid operators transition to low-cost, carbon free renewable energy while enhancing energy security. Storing electricity for eight hours to eight days or longer, the solution reduces CO₂ emissions and dependence on. Lyten engineers its 3D Graphene to exhibit specific electrical, thermal, and mechanical characteristics tailored for different applications. Founded in 2015 and headquartered in San Jose, California, Lyten is a leading company in advanced materials innovation. The announcement late last year of a \$26 million, Series A funding round for new start-up Malta Inc.
