[A novel integrated marginal cost model of multi-type energy storage in](#)

The IMC model proposed in this paper divides the ES cost into two parts: unit fixed cost and unit variable cost, which is based on the improvement of LCOE and marginal cost.

Is JavaScript's "new" keyword considered harmful?

It is NOT 'bad' to use the new keyword. But if you forget it, you will be calling the object constructor as a regular function. If your constructor doesn't check its execution context then it won't notice that 'this'
