The construction of the Huntly BESS follows Genesis Energy's recent launch of what it claims is the country's largest solar PV power plant: the 63MWp Lauriston site, located west of Christchurch on the South Island, near the Rakaia River in the. CentrePort is taking another step on its energy journey with an onsite battery energy storage system (BESS) which will improve resilience and enhance the potential for future emission reductions. BESS systems use large rechargeable batteries to store energy for later use, which can make renewable. In August 2024 we secured development rights for a 136 MWp consented solar site at Edgecumbe in the Bay of Plenty. The 209-hectare site will hold approximately 220,000 solar panels and generate around 230 GWh of renewable electricity annually, enough to power around 30,000 houses. Early engineering. Distributed energy station refers to a clean and environmentally friendly power generation facility with low power (tens of kilowatts to tens of megawatts), small and modular, and distributed near the load.
