What is the 'new' keyword in JavaScript?

The new keyword in JavaScript can be quite confusing when it is first encountered, as people tend to think that JavaScript is not an object-oriented programming language. What is it? What problems

When to use "new" and when not to, in C++?

You should use new when you wish an object to remain in existence until you delete it. If you do not use new then the object will be destroyed when it goes out of scope.

I have a local Git repository that I would like to push to a new remote repository (brand new repository set up on Beanstalk, if that matters). My local repository has a few branches and tags, and I

Is JavaScript's "new" keyword considered harmful?

It is NOT 'bad' to use the new keyword. But if you forget it, you will be calling the object constructor as a regular function. If your constructor doesn't check its execution context then it won't notice that 'this'

[Move the most recent commit \(s\) to a new branch with Git](#)

A graphical version manager where you would just add a tag for the new branch without dealing with what seems to me obscure and archaic

How does the new operator work in JavaScript?

The new operator uses the internal `[]` method, and it basically does the following: Initializes a new native object Sets the internal `[]` of this object, pointing to the Function prototype

[How do I push a new local branch to a remote Git repository and track](#)

How do I: Create a local branch from another branch (via `git branch` or `git checkout -b`). Push the local branch to the remote repository (i.e. `publish`), but make it trackable so that `git pull` and
