

Norway s energy storage power generation

Overview

More than 75% of Norwegian hydropower production is rendered flexible through the use of reservoirs, which represents half of Europe's total reservoir storage capacity. This is a perfect counterbalance to the increasing amount of non-flexible production, exemplified by wind and.

Electricity sector in Norway

OverviewMode of productionProduction and consumptionTransmissionPriceExport/ImportSee alsoFurther reading

Hydroelectric power is the main mode of electricity production. Norway is known for its particular expertise in the development of efficient, environment-friendly hydroelectric power plants. Calls to power Norway principally through hydropower emerged as early as 1892, coming in the form a letter by the former Prime Minister Gunnar Knutsen to parliament. Ninety percent of hydropower capacity is publicly owned and distributed
