Solar Photovoltaic: Everything You Should Know

What is a solar photovoltaic (PV) system? A solar PV system is a technology that converts sunlight directly into electricity using the photovoltaic effect.

Photovoltaics and electricity

A photovoltaic (PV) cell, commonly called a solar cell, is a nonmechanical device that converts sunlight directly into electricity. Some PV cells can convert artificial light into electricity. Sunlight is composed

Can solar panels be installed vertically?

Although vertical solar panels utilize the same technology as conventional photovoltaic modules, their 90° installation angle offers greater flexibility in complex or confined spaces.
