

# Photovoltaic piercing panel connector

## Overview

---

Certified to both IEC and UL standards, it is the first solar piercing connector of its kind, ensuring compliance and safety across global solar projects. Installation is simplified with a two-step process that requires no special tools, making it ideal for projects facing. Check each product page for other buying options. SOLARLOK connectors are engineered to minimize power loss and. Solar panel connectors are an essential component of any solar array. They allow for quick installation, replacement, and maintenance of photovoltaic (PV) panels. It would be impractical to hard-wire solar panels together, so almost every solar installation uses weather-resistant connectors. The types of connectors include combiner box, converter receptacle, end cap, female coupler, male coupler, junction box, and socket. Solar Connectors are electrical.
