

Photovoltaic walkway treads

Overview

These photovoltaic walkway boards are lightweight, high-strength and corrosion-resistant. Installation is fast and they provide safe and stable passage on solar power stations. Applications: Utility-scale solar farms: Module-level access for O&M Commercial rooftops: OSHA-compliant maintenance paths Floating PV systems: Corrosion-resistant versions BIPV projects: Architectural-grade finishes PV Walkway, Solar Panel Walkway, Photovoltaic Maintenance Path. Sunforson's walkway system is a good solution in case of sediment, ice, snow, grease, oil and detergent in wet or other risks under the conditions of channels and operational areas for walking. Solar walkway channels are usually used to homework, industrial workshop floor, narrow. Every solar panel field, rooftop array, or industrial photovoltaic system demands one thing in common: safe, durable, and non-invasive walkable platforms for maintenance teams and inspection crews.
