

# Prefabricated panels for photovoltaic installation

✓ LIQUID/AIR COOLING

✓ INTELLIGENT INTEGRATION

✓ PROTECTION IP54/IP55

✓ BATTERY /6000 CYCLES

## Overview

---

These comprehensive systems combine structural elements, insulation, weather barriers, and photovoltaic surfaces into single prefabricated panels. Key characteristics include: Advantages: Faster installation, consistent quality, integrated thermal management. Our solar panel kits for home are easy for you or a contractor to install. Each solar panel kit comes with solar panels, grid-tie inverters and mounting hardware and is customized to your energy needs and home's unique specifications. Take our quick questionnaire to create a custom solar panel kit. Solar Siding is a prefabricated, all-in-one system that integrates all the layers of the wall with a power generating exterior material. The perforated metal skin helps ventilate the cavity of the wall - helping to cool down and increase the efficiency of the system. Class 1 Div 2 options are available for hazardous environments.

## Prefabricated panels for photovoltaic installation
