

Prices of mobile energy storage systems in Southern Europe

Overview

Recent industry analysis reveals that lithium-ion battery storage systems now average €300-400 per kilowatt-hour installed, with projections indicating a further 40% cost reduction by 2030. However, understanding the cost comparison of container energy storage systems in the EU is. In 2025, Europe's battery storage market entered a new phase of scale and maturity. An executive summary of major cost drivers is provided for reference, reflecting both. Note: Required spread for a two-hour battery project assuming revenues cover project costs of €360,000/MWh in 2024, for previous years assumes BNEF's Europe energy storage system costs. Assumes 90% round-trip efficiency, 85% depth of discharge. Where is the opportunity?

Source: BloombergNEF. 68 billion in 2024 and is expected to be worth around USD 421 billion by 2034, growing at a CAGR of 14.68% over the forecast period 2025 to 2034.
