Overview

These companies strategize for the long haul, knowing upfront panel sales and installations aren't their primary profit sources. The solar panel business has experienced unprecedented growth in recent years, driven by increasing environmental awareness, government incentives, and declining technology costs. After the installation, maintenance positions within the company offer support for the new owners. Many assume selling solar panels is highly lucrative. 7 gigawatts direct current (GWdc) of capacity in Q3 2025, a 20% increase from Q3 2024, a 49% increase from Q2 2025, and the third largest quarter for deployment in the industry's history. These photovoltaic cells are made of semiconductors such as silicon, which absorb the energy from the sun's rays in the solar energy industry.
