

# Reasons for solar power generation

## Overview

---

Not only does installing a solar energy system reduce your reliance on fossil fuels (which improves your air quality and protects the environment), but it can also save you \$25,000 to over \$110,000 over its lifetime. Solar energy is renewable and plentiful. Now, there are over a million solar installations across the country. However, climatic changes due to global warming are fast becoming one of our greatest challenges. We are hoping for sustainable sources because non-renewable sources are responsible for several environmental risks. Most people go solar for economic benefits, but the other benefits of solar may. According to the IEA's Renewable Energy Market Update published in June, this last year has witnessed the largest increase ever in global renewable capacity additions - soaring by 107 gigawatts (GW) to more than 440 GW, with solar PV additions accounting for two-thirds of this increase in renewable. Solar power is demonstrably good for the environment because it provides a clean, renewable source of energy, significantly reducing our reliance on fossil fuels and mitigating the harmful environmental impacts associated with their extraction, processing, and combustion.

## Reasons for solar power generation

---

### REASON Definition & Meaning

The meaning of REASON is a statement offered in explanation or justification. How to use reason in a sentence. Synonym Discussion of Reason.

### What does reasons mean?
