

Renewable energy growth mexico city

Overview

CDMX is leading the renewable city movement, allocating \$17. 1 million liters of biodiesel per year from residual cooking oil, starting in 2024. The country has high solar radiation, wind capacity, and geothermal sources. In addition, with the right technologies and expertise, the country could increase energy storage and green hydrogen projects. Harnessing this potential. Mexico's energy and economic profile presents both challenges and opportunities as a major oil producer, exporter and through its growing domestic energy demand. Mexico was the first large oil producing emerging economy to adopt climate legislation in 2012 and has seen growth in renewable. Mexico is ideally positioned to become a clean energy powerhouse given its world-class renewable energy resource potential and the low cost of renewable energy generation. The agency warns that while momentum is strong, much faster growth is needed to meet.
