

Russian solar panel inverter

Overview

Parus Electro LLC (a part of Rosatom group) created a prototype of the first Russian string inverter, a device that converts the direct current generated by solar panels into alternating current for safe and efficient transmission of energy to consumers through power grids. Companies involved in Inverter production, a key component of solar systems. Russia's renewable energy sector is rapidly evolving, and photovoltaic (PV) inverter technology plays a pivotal role in this transformation. Built-in MPPT solar charge controller simplifies solar panel integration. LCD display with configurable settings (charging current, priority, modes).
