

Solar Power Generation to Rural Areas 2025

Overview

According to NREL's Spring 2025 update, residential solar installations dropped 32% in 2024 amid widespread interconnection constraints, with rural areas disproportionately affected. Many rural projects face extended delays as grid operators manage capacity limitations. Rural areas have become the prime contender to host utility-scale solar photovoltaics (PV). However, many rural zoning ordinances are silent on utility-scale PV, introducing PV because they lack objective data on its potential economic impacts. By combining stakeholder engagement, economic and power system. As of early 2025, over 37. By September 2025, an. According to their analysis, at least three counties in Georgia-Franklin, Jeff Davis, and Thomas-have either enacted bans or imposed moratoriums on such developments. As efforts to conserve farmland intersects with the growth in renewable energy, agrivoltaics emerges as a solution to integrate.
