120V Power
With the frame in place, it was time to install the other IronRidge pieces. Their rails are the centerpiece of the system - we went with the XR1000 which is rated for heavy loads and high winds. Since our panels were 6 across and 5 down, we needed 12 rails (one on each side of each array). Here's a visual. These rails are held on by Rail Connectors See more on tinyshinyhome Author: Jonathan Longnecker
