

Solar module prices drop significantly

Overview

After a brief period of stability, solar module prices are starting to fall once more, declining 5% to 8% across all technologies as of mid-July 2025, according to pvXchange. It sees prices moving back strongly toward the 'unhealthy' levels seen at the beginning of the year. The analysis and cost model results in this presentation ("Data") are provided by the National Renewable Energy Laboratory ("NREL"), which is operated by the Alliance for Sustainable Energy LLC ("Alliance") for the U. Department of Energy (the "DOE"). It is recognized that disclosure of these. An MIT-led study revealed the hidden contributors to plummeting solar costs, and many had nothing to do with solar at all. 39/kilowatt-hours (kWh) to under \$0. IRENA reports significant cost declines for all. According to EnergySage's new Solar & Storage Marketplace Report, prices for both home solar and solar + storage reached record lows in the second half of 2024. Analyzing millions of transaction-level data points from homeowners on EnergySage, it highlighted a clear milestone for solar panels: The average price had dropped 30%. One of the most transformative changes in technology over the last few decades has been the massive drop in the cost of clean energy. Solar photovoltaic costs have fallen by 90% in the last decade, onshore wind by 70%, and batteries by more than 90%.

100% online experience guaranteed to find you the best solar panels for your home. Find solar panels, solar reviews, solar financing, and solar quotes.

Solar power

Solar power, also known as solar electricity, is the conversion of energy from sunlight into electricity, either directly using photovoltaics (PV) or indirectly using concentrated solar power.

Solar Energy

There are two main types of solar energy technologies-photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what solar

Having a Domestic Module supplier (or combination Domestic/Imported) helps to reach the minimum 40% threshold. Having a Domestic Solar Cell really helps the numerator.

Solar explained

People have used the sun's rays (solar radiation) for thousands of years for warmth and for drying food. Over time, we've developed technologies to capture solar energy for heat and to convert it into
